❧ PREFACE ❧

In placing before the trade the second edition of THE JEWELERS' WEEKLY COMPLETE DIRECTORY, the publishers gratefully acknowledge the assistance which has been rendered them by members of the trade in all parts of the country. The first edition, while it constituted a more complete and valuable list than had ever before been offered the trade, was necessarily imperfect. By the most assiduous labor the publishers have eliminated the errors which could not be avoided in a pioneer effort in this direction, and believe that the present volume is as nearly accurate as it is possible to render it.

The book, as issued, is the result of a year of patient and untiring labor and of the expenditure of a large sum of money. Its usefulness will be appreciated by those who may employ it as a book of reference, and their plaudits will be received as a partial compensation for the care expended at every step of the production of the book.

The first edition of the Directory, although characterized by the crudities and imperfections of a pioneer enterprise, was hailed with delight in all branches of the trade, and encomiums have been received by the publishers from many appreciative owners of the book. With full confidence that the present edition is worthy of much higher praise than that accorded its predecessor, the publishers anticipate for it a hearty reception.

Half a Million Copies!

The total circulation of THE JEWELERS' WEEKLY during the twelve months ending August 31st, 1892, was 496,588 copies—an average of 41,382 copies per month.

THE ALL-IMPORTANT QUESTION.

CIRCULATION is an important consideration to advertisers. The burning question is: "What paper has the largest circulation?"

The WEEKLY alone of all jewelry trade papers publishes the figures showing its actual circulation, invites inspection, without previous notice, of its post office receipts and circulation records, and challenges comparison.

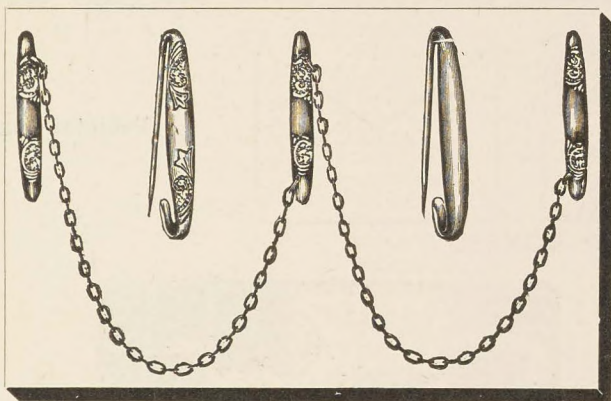

The circulation of the WEEKLY is at least 25 per cent. larger than that of any other journal in the trade.

"TO BE KNOWN IS TO BE APPRECIATED."

IMPROVED UPRIGHT DRILL.

WE take pleasure in bringing to your notice one of the best UPRIGHT DRILLS ever placed upon the market at a medium price.

Height of Drill, 16 inches.

Distance from front of post to center of table, 17½ inches.

Weight, 30 pounds.

By adjusting the thumb screw upon the back of the table clamp it may be moved up and down or right and left.

The chuck is an Almond Drill Chuck, taking a drill from 0 to $\frac{3}{16}$.

The table, which is elevated by an eccentric, will rise and fall half an inch, thereby drilling a hole half an inch deep.

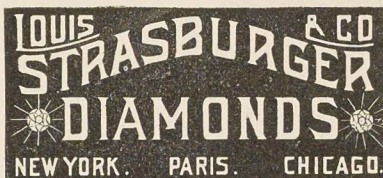

Prices given on application.

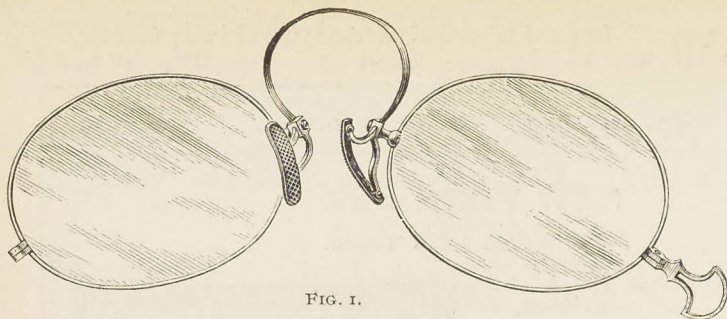

FIG. 1.

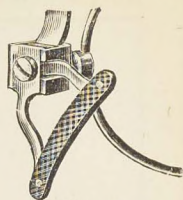

FIG. 2.

WHY IS THE "ECLIPSE" EYE GLASS FRAME THE BEST FITTING OFFSET IN THE MARKET?

BECAUSE

1. The guard remains perfectly rigid in the post.
2. The guard is made of two arms, one running at right angles to the frame and passing through a slot in the post which positively locks the guard. (See Fig. 2.)
3. It is easy to fit; the arms of the guards being thin and pliable any desired shape can be given to them.
4. No other guard is so light, clean, and has so little metal.
5. It is fashionable fitting.
